Arabinda Narayan Das (Auro)

Senior Product Manager · AI · Consumer Internet · B2B SaaS

arabindadas214@gmail.com
auronara.com · linkedin.com/in/arabinda-narayan-das
Guwahati, India · Worked in Mumbai, Bangalore, Delhi

Product leader with seven years of building consumer and enterprise products, from 0 to 1 and through growth. Scaled MX Games from zero to 500K daily users, launched a luxury travel platform as founding PM, and now take AI products from pilot to production with enterprise clients.

500K daily users built at MX Games in 18 months	**35%** revenue recovered by stopping leaderboard fraud	**80%** organic sign-up growth at AdmireAsia	**7** institution agreements, including 4 IITs

EXPERIENCE

Senior Product Manager · Trumio
Apr 2024 – Present

AI-native, proof-of-work platform where engineers prove their skills by doing real work

- Identified that human-led delivery could not scale and shaped the strategy for AI-automated experiential learning; proposed an AI interview after every module instead of only a pre- and post-test.
- Took **Mio**, an AI voice interviewer and coach, from pilot to production with enterprise clients: owned testing with learners, client rollout and the daily feedback loop between clients, learners, product and engineering.
- Drove fixes for production failure modes: long interviews drifting off-level (better voice and models, transcription, questions locked to program level) and AI-assisted cheating (recorded, proctored sessions with voided retakes).
- 500–1,000 enterprise learners assessed with ~1,500 data points each; detailed evidence reports used by clients to make deployment decisions. 100% completion across concurrent enterprise programs; accounts generating $100K+ revenue.

Earlier, Trumio's student project marketplace

- Owned the student side. Built a bottom-up campus strategy through student leaders, backed by the founders' IIT Kharagpur alumni network: engaged 5,000+ students, onboarded ~2,000, and signed agreements with 7 institutions, including IIT Kharagpur, Kanpur, BHU and Bhubaneswar, in 10–12 months. 1 in 5 clients returned for repeat projects.

Founding Product Manager · AdmireAsia, Bangalore
Jan 2022 – Jul 2023

Luxury travel-tech platform

- Owned the 0 to 1 product lifecycle, from customer discovery and problem definition to strategy, roadmap and launch, leading a 12-person engineering, design and operations team.
- Drove **80% organic sign-up growth** and **30% booking conversion** through funnel analysis, user research and experimentation.
- Built an AI-powered workflow tool that cut task-completion time by 90% and increased engagement by 200%.

Associate Product Manager (promoted from Program Executive) · Amazon MX Player, Mumbai
Apr 2020 – Sep 2021

India's largest streaming app, 200M+ monthly users

- Scaled **MX Games from 0 to 500K daily users in 18 months**, with 30–45 minutes average daily time spent; worked directly with the Head of Product and Head of Games.
- Caught a leaderboard fraud ring through the data, then designed a realistic score-ceiling policy with engineering; **recovered 35% of revenue**. Owned prize budgets; engagement recovered within two weeks of cutting the prize pool.
- Ran the game pipeline end to end: tested and launched **145 hyper-casual games**, led 3 associates, and automated tournaments and budget reloads, **cutting CRM costs by 67%**.
- Grew and retained players with user research, targeted CleverTap notifications, a Zomato rewards partnership and two IPL games of my own design. Best Individual Performer and Dream Product Team of the Year, 2020.

Product Associate · Times Internet, Mumbai
Apr 2019 – Mar 2020

- Contributed to a 171% increase in DAU through casual, multiplayer and real-time gaming launches; set up user-research loops that shaped the roadmap. Won the Times Internet Hackathon as an intern.

SIDE PROJECTS

Invari.ai · product lead — Live at invari.ai

- A proxy that repairs malformed API requests from AI agents in under 30ms, with one URL change. Led the product: problem framing, portal design, the confidence-scoring and blocking spec, brand story and promo film. A technical co-founder built the engineering with Claude.

Sin Football · co-founder — Founded at 20

SKILLS

Product: 0 to 1, strategy, roadmaps, discovery, user research, growth, funnels, experimentation, enterprise rollout

AI: AI products and agents, voice AI, evaluation and failure modes, Claude Code, Cursor, Replit

Tools: Amplitude, GA4, Mixpanel, PostHog, CleverTap, Figma, Miro, Jira, HubSpot

EDUCATION

BA Economics, IGNOU (in progress)
B.Sc Physics, St. Xavier's College, Mumbai (not completed)
Certified in Product Management, Product Strategy, Generative AI
